Worlds Final Destiny

By Mendoza-Garrastazu

Philosophical Art

It seems that the final solution of the world is to find another planet to immigrate. Because of one reason or another this world will not be sustainable as we know it today.

Natures cycle will impose it self one way or another.

The interesting element of this art is how we can project our self into a future so far away from us today.

Dark Matter

By Mendoza-Garrastazu

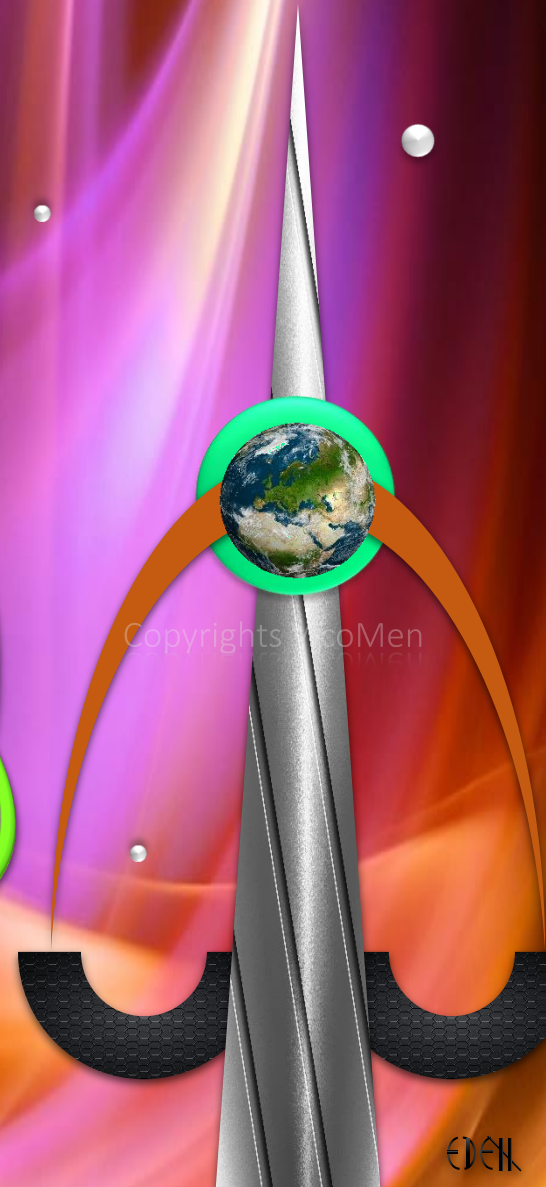

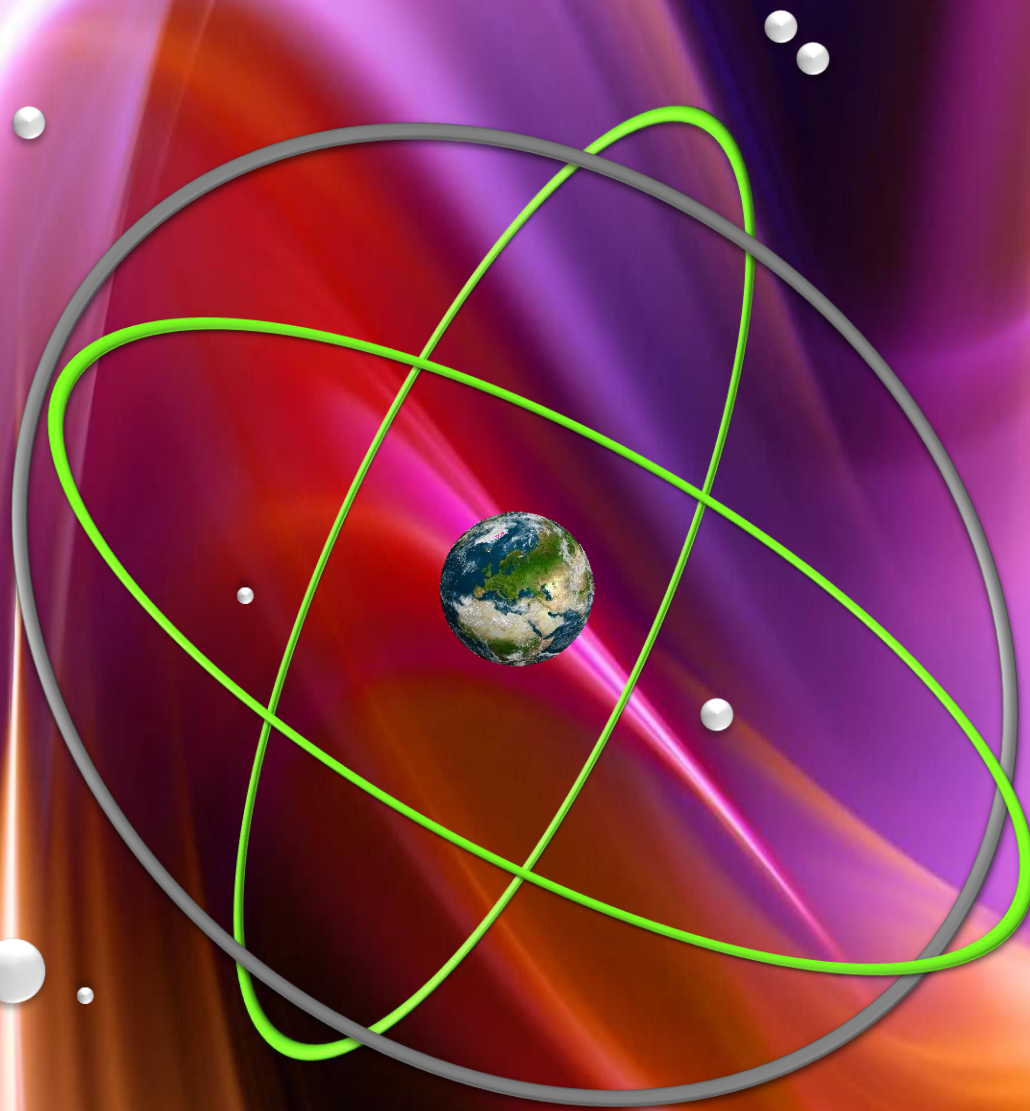

Philosophical Art

Dark Matter is estimated to constitute 84.5% of the total matter in the universe, it neither emits nor absorbs light or other electromagnetic radiation.

But at the same time it has a direct effect on visible, matter , What is that that we can not see , and it is there.

Why is it that the universe that we can see is only a very small portion of the total. Who is in the dark ? Where is reality, the small portion we see? Or the other side we can't see.

By Mendoza-Garrastazu

Philosophical Art

God deals, and you play,

It up to you to improve your position, to make something out of it. This is part of the test ?

Each player must accept the cards life deals him or her: but once they are in hand, he or she alone must decide how to play the cards in order to win the game.
